

List of accepted abstracts (Update 9 March 17)
 Extended papers can be submitted by March 31

Topics	ID	Title	Authors
Advanced wind engineering tools	23	A Force Action Based Interpretation of Damping	Robert McNamara US
Advanced wind engineering tools	44	Measuring Wind with Micro Planes	Simon Watkins, RMIT University AU, Abdulghani Mohamed, RMIT University AU, Samuel Prudden, RMIT University AU, Matthew Marino, RMIT University AU, Reece Clothier, RMIT University AU, Alex Fisher, RMIT University AU, , , , , , , ,
Advanced wind engineering tools	185	Inflatable walls for wind tunnels	olivier flamand, CSTB FR, anthony couzinet, CSTB FR, jean-christophe thomas, université de Nantes FR, , , , , , , , , , , ,
Advanced wind engineering tools	192	Experimental and numerical appraisal of wind-induced noise	Sergey Mijorski, SoftSim Consult Ltd. BG, Magnus Lysfjord, BMT Fluid Mechanics Ltd. NO, Stefano Cammelli, BMT Fluid Mechanics Ltd. GB, Ganesh Krishnan, BMT Fluid Mechanics Ltd. MY, Richard Jackett, National Physical Laboratory GB, , , , , , , , , , ,
Advanced wind engineering tools	204	Recent advancement in the extraction of Equivalent Static Wind Loads	Luca Patruno, University of Bologna IT, Mattia Ricci, University of Bologna IT, Stefano de Miranda, University of Bologna IT, , , , , , , , , , , ,
Advanced wind engineering tools	212	Jules Verne 2.0, renewal of a large wind tunnel facility	Pierre Palier, CSTB FR, Jean-Paul Bouchet, CSTB FR, Sylvain Aguinaga, CSTB FR, Anthony Couzinet, CSTB FR, Philippe Delpech, CSTB FR, , , , , , , , , , ,
Advanced wind engineering tools	230	CFD and PIV study of the airflow in and around a saddle-shaped double-roofed stadium	Rubina Ramponi, ARUP, Advanced Technology & Research GB, Paul Lynch, ARUP, Advanced Technology & Research GB, Mutlu Ucuncu, ARUP, Advanced Technology & Research GB, Steve Walker, ARUP, Advanced Technology & Research GB, , , , , , , , , , , ,

Bluff body aerodynamics	5	The calculation of train stability in tornado winds	Christopher Baker, University of Birmingham GB, , , , , , , , , , , , , , , , ,
Bluff body aerodynamics	10	Aerodynamic optimization of cross-section of tall buildings using CFD and reduced basis technique	Santiago Hernandez, University of Coruna ES, Felix Nieto, University of Coruna ES, , , , , , , , , , ,
Bluff body aerodynamics	16	A full-scale experimental study of freight train aerodynamics	David Soper, University of Birmingham GB, Chris Baker, University of Birmingham GB, , , , , , , , , , ,
Bluff body aerodynamics	19	Dynamic properties of wind-excited linked tall buildings considering both intra- and inter-building structural couplings	Jie Song, Wuhan University CN, Shuguo Liang, Wuhan University CN, Gang Hu, Hong Kong University of Science and Technology HK, , , , , , , , , , ,
Bluff body aerodynamics	20	The aerodynamic flow beneath a high speed train: A numerical and experimental analysis	Dominic Flynn, University of Birmingham GB, David Soper, University of Birmingham GB, Adam Jackson, University of Birmingham GB, Hassan Hemida, University of Birmingham GB, Chris Baker, University of Birmingham GB, , , , , , , , , , ,
Bluff body aerodynamics	24	Wind tunnel testing of bridge deck section models with a new forced vibration rig	Bartosz Siedziako, Norwegian University of Science and Technology NO, Ole Øiseth, Norwegian University of Science and Technology NO, Anders Rønning, Norwegian University of Science and Technology NO, , , , , , , , , , ,
Bluff body aerodynamics	34	Wind tunnel tests to study the Wind loads on and reduce the ballast needed for solar energy systems on flat roofs	Marcel van Uffelen, Peutz Ltd NL, , , , , , , , , , , , , , , ,
Bluff body aerodynamics	42	Role of low-frequency vortices on dry galloping of inclined stay cable	Hiroshi Katsuchi, Yokohama National University JP, Hung Vo Duy, Yokohama National University JP, Hitoshi Yamada, Yokohama National University JP, , , , , , , , , , ,
Bluff body aerodynamics	51	On the fluid dynamics of circular cylinders with span-wise waviness	Kai Zhang, Yokohama National University JP, Hiroshi Katsuchi, Yokohama National University JP, Dai Zhou, Shanghai Jiao Tong University CN, Hitoshi Yamada, Yokohama National University JP, , , , , , , , , , ,
Bluff body aerodynamics	58	Peak negative pressure coefficients on low-tilted solar arrays mounted on flat roofs: The effects of building size and model scale	Thorsten Kray, I.F.I. Institut für Industrieaerodynamik GmbH DE, Jantje Paul, I.F.I. Institut für Industrieaerodynamik GmbH DE, , , , , , , , , , ,
Bluff body aerodynamics	74	IN-LINE OSCILLATION CHARACTERISTICS OF TWO SQUARE CYLINDERS IN A TANDEM ARRANGEMENT	Kazutoshi Matsuda, Kyushu Institute of Technology JP, Kusuo Kato, Kyushu Institute of Technology JP, Kentaro Suda, Kyushu Institute of Technology JP, Yuta Nakamura, Kyushu Institute of Technology JP, , , , , , , , , , ,
Bluff body aerodynamics	76	Influence of turbulence and surface irregularities on joint probability distribution of circular cylinder vibrations	Arseniy Trush, Faculty of Civil Engineering, Czech Technical University CZ, Sergey Kuznetsov, Institute of Theoretical and Applied Mechanics CZ, Stanislav Pospíšil, Institute of Theoretical and Applied Mechanics, Hrvoje Kozmar, Faculty of Mechanical

			Engineering and Naval Architecture HR, Jiří Náprstek, Institute of Theoretical and Applied Mechanics CZ, , , , , , , ,
Bluff body aerodynamics	83	Flutter and galloping of bridge decks with roadway wind barriers	Andrija Buljac, Faculty of Mechanical Engineering and Naval Architecture, University of Zagreb HR, Hrvoje Kozmar, Faculty of Mechanical Engineering and Naval Architecture, University of Zagreb HR, Stanislav Pospíšil, Institute of Theoretical and Applied Mechanics, Prague CZ, Michael Macháček, Institute of Theoretical and Applied Mechanics, Prague CZ, , , , , , , , ,
Bluff body aerodynamics	89	Cross-Wind load effects on different vehicle body geometries	Kaustav Bhadra, Birla Institute of Technology and Science, Pilani, Hyderabad Campus IN, Sabareesh Geetha Rajasekharan, Birla Institute of Technology and Science, Pilani, Hyderabad Campus IN, Ram Chandra Murthy K., Birla Institute of Technology and Science, Pilani, Hyderabad Campus IN, , , , , , , , ,
Bluff body aerodynamics	90	Effect of steady stationary laboratory simulated downburst flow on a standard tall building	Chowdhury Jubayer, WindEEE Research Institute CA, Horia Hangan, WindEEE Research Institute CA, , , , , , , , , , , ,
Bluff body aerodynamics	97	Fluctuating lift suppression on the 2D square prism with unsteady fluid actuators	Daniel Lander, Rensselaer Polytechnic Institute US, Daniel Moore, Rensselaer Polytechnic Institute US, Michael Amitay, Rensselaer Polytechnic Institute US, Christopher Letchford, Rensselaer Polytechnic Institute US, , , , , , , , ,
Bluff body aerodynamics	109	Turbulence Structures Around the Rock of Gibraltar	Elvin Hii, BMT Fluid Mechanics GB, David Hankin, BMT Fluid Mechanics GB, Stefano Cammelli, BMT Fluid Mechanics GB, , , , , , , , , , ,
Bluff body aerodynamics	129	Computational studies of vortex-induced vibration of a bending 5:1 rectangular cylinder	Dinh Tung Nguyen, University of Nottingham GB, David Hargreaves, University of Nottingham GB, John Owen, University of Nottingham GB, , , , , , , , , , ,
Bluff body aerodynamics	131	Study on Extraction Parameters of Flutter Derivatives for the Development of a Time-Domain Formulation of Self-Excited Forces	Sébastien Maheux, Université de Sherbrooke CA, Sébastien Langlois, Université de Sherbrooke CA, Frédéric Légeron, Parsons AE, , , , , , , , , , ,
Bluff body aerodynamics	133	Aerodynamic performance of grooved cylinders in flow conditions encountered by bridge stay cables in service	Jungao Wang, University of Stavanger NO, Jasna Bogunović Jakobsen, University of Stavanger NO, , , , , , , , , , , ,
Bluff body aerodynamics	137	Effects of double eaves on wind load of Chinese traditional timber slope roofs	Wenshan Shan, Beijing Jiaotong University CN, Qingshan Yang, Beijing Jiaotong University CN, Bo Li, Beijing Jiaotong University CN, Yukio Tamura, Beijing Jiaotong University CN, , , , , , , , , , ,
Bluff body aerodynamics	141	Experimental and numerical aerodynamic optimization of a post-tensioned concrete railway bridge in tandem arrangement with a truss road bridge	Luca Amerio, Politecnico di Milano - Department of Mechanical Engineering IT, Tommaso Argentini, Politecnico di Milano - Department of Mechanical Engineering IT, Daniele Rocchi, Politecnico di Milano - Department of Mechanical Engineering IT, Alberto Zasso, Politecnico di Milano - Department of Mechanical Engineering IT, , , , , , , , , , ,

Bluff body aerodynamics	157	Characterization of the shear layer instability on the 2D square prism	Daniel Moore, Rennselaer Polytechnic Institute US, Daniel Lander, Rennselaer Polytechnic Institute US, Chris Letchford, Rennselaer Polytechnic Institute US, Michael Amitay, Rennselaer Polytechnic Institute US, , , , , , , , , , ,
Bluff body aerodynamics	159	AEROACOUSTIC INVESTIGATION OF THE EFFECT OF VORTEX SHEDDING ON THE NOISE LEVEL EMITTED BY CIRCULAR CYLINDER	GINU GEORGE, HOCHSCHULE DUSSELDORF DE, Till Biederman, HOCHSCHULE DUSSELDORF DE, Arko Majumader, HOCHSCHULE DUSSELDORF DE, , , , , , , , , , ,
Bluff body aerodynamics	162	Investigation of crosswind-induced load effects on free-standing lattice towers	Ileana Calotescu, Technical University of Civil Engineering Bucharest RO, Andrea Freda, University of Genoa IT, Giovanni Solari, University of Genoa IT, , , , , , , , , , ,
Bluff body aerodynamics	164	A low Re flow around four side-by-side circular cylinders	MD MAHBUB ALAM, HIT Shenzhen CN, Qinmin Zheng, HIT Shenzhen CN, Kerry Hourigan, Monash University AU, , , , , , , , , , ,
Bluff body aerodynamics	166	Experimental wind tunnel tests and numerical analysis of the aerodynamic behaviour of a high tapered obelisk	Luca Amerio, Politecnico di Milano IT, Tommaso Argentini, Politecnico di Milano IT, Luca Bernini, Politecnico di Milano IT, Federico Perotti, Politecnico di Milano IT, Alberto Zasso, Politecnico di Milano IT, , , , , , , , , , ,
Bluff body aerodynamics	196	PIV Analysis of the Flow Around Concave Bridge Cable Fillets	Celeste Burlina, DTU - Technical University of Denmark DK, Christos Thomas GEorgakis, University of Aarhus DK, , , , , , , , , , ,
Bluff body aerodynamics	197	3DOF galloping analysis based on quasi-steady theory with reference to the aerodynamic stiffness	Mingzhe He, University of Bristol GB, John Macdonald, University of Bristol GB, , , , , , , , , , ,
Bluff body aerodynamics	232	Quantification of effect of inclined webs on flutter performance of box girders	Qi Wang, Southwest Jiaotong University CN, Haili Liao, Southwest Jiaotong University CN, Mingshui Li, Southwest Jiaotong University CN, , , , , , , , , , ,
Bluff body aerodynamics	233	Unsteady pressure distributions on a 4:1 rectangular cylinder: comparison of numerical and experimental results using decomposition methods.	Amandine Guissart, ULg BE, Thomas Andrianne, ULg BE, G. Dimitriadis, ULg BE, V.E. Terrapon, ULg BE, , , , , , , , , , ,
Computational wind engineering	13	Optimum design of cable stayed bridges with single box deck considering aeroelastic and structural constraints	Santiago Hernández, Universidade da Coruña ES, Miguel Cid Montoya, Universidade da Coruña ES, Félix Nieto, Universidade da Coruña ES, Jose Ángel Jurado, Universidade da Coruña ES, , , , , , , , , , ,
Computational wind engineering	15	Numerical modelling of wind-blown rain on railway station platforms and mitigation through canopy design	Dominic Flynn, University of Birmingham GB, Hassan Hemida, University of Birmingham GB, Chris Baker, University of Birmingham GB, , , , , , , , , , ,
Computational wind engineering	21	Large eddy simulation of flow field above and within urban canopy using SGS model based on turbulent structures	Azusa ONO, Shimizu Corporation JP, , , , , , , , , , ,

Computational wind engineering	32	Utilization of Immersed Boundary Method to Simulate Flow Around	Shuyang CAO, Tongji University CN, Jinxin CAO, Tongji University CN, ,
Computational wind engineering	41	The effect of urban geometry of London on pedestrian level wind speeds - A quantitative analysis	Leonidas Tschritzis, University of Kent GB, Marialena Nikolopoulou, University of Kent GB, ,
Computational wind engineering	50	Comparison of CFD simulations with a benchmark wind tunnel test for wind loads	Okke Bronkhorst, TNO NL, Carine van Bentum, TNO NL, Chris Geurts, TNO NL, Corina Hulsbosch-Dam, TNO NL, ,
Computational wind engineering	54	PRECURSOR SIMULATION FOR LES VALIDATION STUDY OF THE MICHELSTADT CASE	Jörg Franke, Faculty of Engineering, Vietnamese-German University (VGU) VN, Thanh Ha Pham, Faculty of Engineering, Vietnamese-German University (VGU) VN, ,
Computational wind engineering	66	Inflow uncertainty definition for atmospheric flows in rural and urban environments	Clara García-Sánchez, von Karman Institute for Fluid Dynamics BE, Catherine Gorlé, Civil and Environmental Engineering department, Stanford University US, ,
Computational wind engineering	71	Natural Ventilation Energy Saving Potential by CFD	Theodore Stathopoulos, Concordia University CA, Leon (Liangzhu) Wang, Concordia University CA, Jun Cheng, Concordia University CA, ,
Computational wind engineering	72	Large-eddy simulations of the atmospheric boundary layer for calculating wind loads on buildings	Catherine Gorlé, Stanford University US, Clara García-Sánchez, Stanford University US, ,
Computational wind engineering	77	Calculation of the driving rain wall factor using ray-tracing	Stella Tsoka, Aristotle University of Thessaloniki GR, Thomas K. Thiis, Norwegian University of Life Science NO, ,
Computational wind engineering	78	A New Urban Test Campaign for Numerical Uncertainty Quantification	Jorge Sousa, Stanford University US, Catherine Gorlé, Stanford University US, ,
Computational wind engineering	80	RANS Turbulence Model Form Uncertainty Quantification for the flow around a wall-mounted cube	Stéphanie Zeoli, UMONS BE, Laurent Bricteux, UMONS BE, Catherine Gorlé, Stanford University US, ,
Computational wind engineering	93	A multi-fidelity shape optimization via surrogate modeling for civil structures	Fei Ding, NatHaz Modeling Laboratory, Department of Civil and Environmental Engineering and Earth Sciences, University of Notre Dame US, Ahsan Kareem, NatHaz Modeling Laboratory, Department of Civil and Environmental Engineering and Earth Sciences, University of Notre Dame US, Seymour Spence, Department of Civil and Environmental Engineering, University of Michigan US, ,

Computational wind engineering	102	Numerical study of unsteady aerodynamic characteristics for one-way tensioned membrane structure	Tian Li, Beijing's Key Laboratory of Structural Wind Engineering and Urban Wind Environment, School of Civil Engineering, Beijing Jiaotong University, Beijing 100044, P.R. China CN, Qingshan Yang, Beijing's Key Laboratory of Structural Wind Engineering and Urban Wind Environment, School of Civil Engineering, Beijing Jiaotong University, Beijing 100044, P.R. China CN, Takeshi Ishihara, Department of Civil Engineering, School of Engineering, The University of Tokyo, Tokyo 113-8656, Japan JP,, , , , , , , , , , ,
Computational wind engineering	104	Study of RANS simulation of ABL flow over complex terrains - comparison with LIDAR monitoring at Xiao-Ping-Ding	Yi-Chao Li, Wind Engineering Research Central of Tamkang university TW, Cheng-Hsin Chang, Tamkang university TW, Tsung-Chin Yang, Cheetah Industrial Aerodynamic Tech Co., Ltd. TW,, , , , , , , , , , ,
Computational wind engineering	110	Steady RANS simulation of the homogeneous neutrally stratified atmospheric boundary layer	Mihael Cindori, University of Zagreb HR, Franjo Juretić, University of Zagreb HR, Hrvoje Kozmar, University of Zagreb HR, Ivo Džijan, University of Zagreb HR,, , , , , , , , , , ,
Computational wind engineering	121	An Efficient Computational Wind Engineering Approach for the Design of Added Mass Dampers for Tall Structures	Mate Pentek, Chair of Structural Analysis, Technical University of Munich DE, Roland Wuchner, Chair of Structural Analysis, Technical University of Munich DE, Kai-Uwe Bletzinger, Chair of Structural Analysis, Technical University of Munich DE,, , , , , , , , , , , , ,,
Computational wind engineering	122	Numerical analysis of forced convective heat transfer coefficients at the facades of a low-rise building: influence of wind direction	Samy lousef, Eindhoven University of Technology NL, Hamid Montazeri, Katholieke Universiteit Leuven BE, Bert Blocken, Katholieke Universiteit Leuven BE, Pieter van Wesemael, Eindhoven University of Technology NL,, , , , , , , , , , ,
Computational wind engineering	125	Vortex induced vibrations on circular structures: Numerical modeling of aerodynamic loads.	Ulf Winkelmann, Ruhr-Universität Bochum DE, Anina Šarkić Glumac, University of Belgrade RS, Francesca Lupi, Ruhr-Universität Bochum (on leave from University of Florence) DE, Rüdiger Höffer, Ruhr-Universität Bochum DE,, , , , , , , , , , ,
Computational wind engineering	138	Effect of shape modifications on wind loads of a parabolic trough solar collector	Andrew Brodie, Technische Universität München DE, Michael Andre, Technische Universität München DE, Roland Wüchner, Technische Universität München DE, Kai-Uwe Bletzinger, Technische Universität München DE,, , , , , , , , , , ,
Computational wind engineering	143	Numerical simulation of the torsional stall flutter of a parabolic trough solar collector	Michael Andre, Technische Universität München DE, Roland Wüchner, Technische Universität München DE, Kai-Uwe Bletzinger, Technische Universität München DE,, , , , , , , , , , ,
Computational wind engineering	146	Assessment of pedestrian comfort using numerical simulations: benchmarking of two numerical approaches against wind tunnel measurements	Sylvain Aguinaga, CSTB FR, Stephane Sanquer, MeteoDyn FR, Marc Dufresne de Virel, CSTB FR,, , , , , , , , , , ,
Computational wind engineering	148	ADDED MASS AND DAMPING MODELING FOR THE DESIGN OF MEMBRANE STRUCTURES BASED ON FULLY-COUPLED FSI INVESTIGATIONS	Hosam AISofi, Technical University of Munich DE, Ann-Kathrin Goldbach, Technical University of Munich DE, Roland Wüchner, Technical University of Munich DE, Kai-Uwe Bletzinger, Technical University of Munich DE,, , , , , , , , , , ,
Computational wind engineering	151	Reviewing state-of the art computational wind engineering for high-rise buildings and application of a test case	Marie Skytte Thordal, Ramboll Denmark and The Technical University of Denmark DK, Jens Christian Bennetsen, Ramboll Denmark DK, H. Holger H. Koss, The Technical University of Denmark DK,, , , , , , , , , , ,

Computational wind engineering	154	Application of surrogate models in the characterization of the aerodynamic response of streamlined bridge decks	Miguel Cid Montoya, University of La Coruna ES, Felix Nieto, University of La Coruna ES, Ibuki Kusano, University of La Coruna ES, Antonio J. Álvarez, University of La Coruna ES, Santiago Hernandez, University of La Coruna ES, , , , , , , , , , ,
Computational wind engineering	174	CFD study towards a solution for wind speed gradient reduction by large wind screens near a car carrier port	Wendy Janssen, Port of Rotterdam NL, Bert Blocken, Eindhoven University of Technology NL, Herm Jan van Wijhe, Port of Rotterdam NL, , , , , , , , , , , ,
Computational wind engineering	182	Large Eddy Simulation of Pressure Fluctuations on a Surface-mounted Cube	Romain Guichard, INRS FR, , , , , , , , , , , , , , , ,
Computational wind engineering	184	CFD simulations of near-field pollutant dispersion with different plume buoyancies	Yoshihide Tominaga, Niigata Institute of Technology JP, Ted Stathopoulos, Concordia University CA, , , , , , , , , , , , , , , ,
Computational wind engineering	210	Large-eddy simulations of flow around a high-rise building: Validation and sensitivity analysis on turbulent statistics	Tsubasa Okaze, Tokyo Institute of Technology JP, Hideki Kikumoto, The University of Tokyo JP, Hiroki Ono, Central Research Institute of Electric Power Industry JP, Masashi Imano, OCAEL Co. Ltd. JP, Takamasa Hasama, Kajima Corporation JP, Takeshi Kishida, Central Research Institute of Electric Power Industry JP, Keisuke Nakao, Central Research Institute of Electric Power Industry JP, Naoki Ikegaya, Kyushu University JP, Yuichi Tabata, Obayashi Corporation JP, Yoshihide Tominaga, Niigata Institute of Technology JP
Computational wind engineering	211	Atmospheric Boundary Layer Conditions in an Open-Circuit Low-Speed Wind Tunnel in Colombia	Martha Delgado, Universidad del Valle CO, Johannio Marulanda, Universidad del Valle CO, Peter Thomson, Universidad del Valle CO, , , , , , , , , , , , , , , ,
Computational wind engineering	215	Application of CFD simulations of Wind-driven rain (WDR) on the new roof extension for San Mames New Football Stadium	Javier Llarena, IDOM ES, Lourdes Cabezuelo, IDOM ES, Armando Bilbao, IDOM ES, , , , , , , , , , , , , , , ,
Computational wind engineering	216	Reviewing state-of-the-art computational wind engineering for high-rise buildings and application of a test case	Marie Skytte Thordal, Technical Univrsity of Denmark DK, Jens Christian Benetsen, Rambøll DK, Holger Hundborg Koss, Technical University of Denmark DK, Tim Gudmand-Høyer, Rambøll DK, , , , , , , , , , , , , , , ,
Computational wind engineering	219	Benchmark for self-accreditation	Holger Hundborg Koss, Technical University of Denmark DK, Leika D. Jørgensen, Vind-Vind DK, Per J. Jørgensen, Vind-Vind DK, Morten K. Rasmussen, Danish Technological Institute DK, , , , , , , , , , , , , , , ,
Computational wind engineering	225	Large Eddy Simulations for wind loads assessment: benchmark on a high-rise building	Mattia Ricci, University of Bologna and TU/Eindhoven IT, Luca Patruno, University of Bologna IT, Ivo Kalkman, TU Eindhoven NL, Bert Blocken, TU Eindhoven NL, Stefano de Miranda, University of Bologna IT, , , , , , , , , , , , , , , ,
Computational wind engineering	227	Large eddy simulation of a cross-ventilated building: validation and impact of inflow generators	Raffaele Vasaturo, Eindhoven University of Technology NL, Ivo Kalkman, Eindhoven University of Technology NL, Bert Blocken, Eindhoven University of Technology NL, Pieter van Wesemael, Eindhoven University of Technology NL, , , , , , , , , , , , , , , ,

Computational wind engineering	228	Evaluation of computational domain on CFD simulation of flow in a long street canyon under a perpendicular wind direction	Zhengtao Ai, The Hong Kong Polytechnic University HK, Cheuk-ming Mak, The Hong Kong Polytechnic University HK, , , , , , , , , , , ,
Computational wind engineering	236	Interference effects between two elliptic towers: wind tunnel experiments combined with CFD analyses	Michal Franek, Slovak University of Technology in Bratislava SK, Nicolas Blaise, University of Liège BE, Thomas Andrianne, University of Liège BE, , , , , , , , , , , ,
Computational wind engineering	245	Numerical Simulation of WINDEEE Dome Downburst for Open Terrain Using Physical Roughness Elements	Ibrahim Ibrahim, The University of Western Ontario, Canada ; Ashraf El Damatty, The University of Western Ontario, Canada
Field monitoring, full scale and wind tunnel measurements	3	A parametric study of a tornado generator’s geometric design on the flow field	Stefanie Gillmeier, School of Engineering, The University of Birmingham, Edgbaston, Birmingham, UK GB, Hassan Hemida, School of Engineering, The University of Birmingham, Edgbaston, Birmingham, UK GB, Mark Sterling, School of Engineering, The University of Birmingham, Edgbaston, Birmingham, UK GB, , , , , , , , , , , ,
Field monitoring, full scale and wind tunnel measurements	4	EXPERIMENTAL STUDY OF TORSION ON THE MODEL OF GUYED MAST SHAFT	Shota Urushadze, Institute of Theoretical and Applied Mechanics AS CR, v. v. i, Prague, Czech Republic. CZ, Miroš Pirner, Institute of Theoretical and Applied Mechanics AS CR, v. v. i, Prague, Czech Republic. CZ, , , , , , , , , , , ,
Field monitoring, full scale and wind tunnel measurements	25	Field Monitoring of the Forth Road Bridge	John Owen, University of Nottingham GB, Xiaolin Meng, University of Nottingham GB, , , , , , , , , , , ,
Field monitoring, full scale and wind tunnel measurements	26	Experimental Investigation on the Wind Force of a Scaffolding System	Fuh-Min Fang, National Chung Hsing University TW, Shi-Xian Chang, National Chung Hsing University TW, Chen-Yang Chung, National Cheng Kung University TW, Yi-Chao Li, Tamkang University TW, Chern-Hwa Chen, National University of Kaosiung TW, , , , , , , , , , , ,
Field monitoring, full scale and wind tunnel measurements	33	Wind Tunnel Experiments for Street-Level Ventilation over Urban Areas	Chun-Ho Liu, Department of Mechanical Engineering, The University of Hong Kong HK, Yat-Kiu Ho, Department of Mechanical Engineering, The University of Hong Kong HK, Ziwei Mo, Department of Mechanical Engineering, The University of Hong Kong HK, , , , , , , , , , , ,
Field monitoring, full scale and wind tunnel measurements	47	Wind loads on external sun blinds: a case study	Chris Geurts, TNO NL, Okke Bronkhorst, TNO NL, Carine van Bentum, TNO NL, , , , , , , , , , , ,
Field monitoring, full scale and wind tunnel measurements	53	Amplitude-dependent damping ratio of a cable-suspended roof identified from full-scale data	Bo Chen, Beijing Jiaotong University CN, Qingshan Yang, Beijing Jiaotong University CN, , , , , , , , , , , ,
Field monitoring, full scale and wind tunnel measurements	55	Quantitative Relationship between Surface Roughness Parameters obtained from Building Information Database and Wind Turbulence near the Ground Surface	Ryoji Sasaki, Wind Engineering Institute Co., Ltd. JP, Yasushi Uematsu, Tohoku University JP, , , , , , , , , , , ,

Field monitoring, full scale and wind tunnel measurements	57	Wind field characteristics at Hardanger Bridge site: Comparison of wind tunnel terrain model tests with full-scale measurements	Tor Martin Lystad, Norconsult/NTNU NO, Aksel Fenerci, NTNU TR, Ole Øiseth, NTNU NO, , , , , , , , , , , ,
Field monitoring, full scale and wind tunnel measurements	60	Identifying aerodynamic derivatives of a slotted box girder in a forces vibration set up using a harmonic and arbitrary motion	Henrik Skyvulstad, Norconsult/NTNU NO, Bartosz Siedziako, NTNU PL, Ole Øiseth, NTNU NO, , , , , , , , , , , ,
Field monitoring, full scale and wind tunnel measurements	62	Full-scale measurements of wind loads on a high-rise building using wind tunnel based predictions	Sergey Kuznetsov, Institute of Theoretical and Applied Mechanics CZ, Stanislav Pospíšil, Institute of Theoretical and Applied Mechanics CZ, , , , , , , , , , , ,
Field monitoring, full scale and wind tunnel measurements	65	The effect of wind field modeling on buffeting response analysis of long-span suspension bridges	Aksel Fenerci, Norwegian University of Science and Technology NO, Ole Øiseth, Norwegian University of Science and Technology NO, , , , , , , , , , , ,
Field monitoring, full scale and wind tunnel measurements	96	Field Measurements of Wind-driven Rain: Verification and Expansion of Site Wind Conditions	Vincent Chiu, CA, Hua Ge, Concordia University CA, Ted Stathopoulos, Concordia University CA, , , , , , , , , , , ,
Field monitoring, full scale and wind tunnel measurements	103	Indoor Tests for the Aeolian Vibration of Transmission Lines	Tian Peng, Tongji University CN, Qiang Xie, Tongji University CN, Jian Zhang, Tongji University CN, , , , , , , , , , , ,
Field monitoring, full scale and wind tunnel measurements	108	WIND TUNNEL TESTS AND NUMERICAL INVESTIGATION IN ORDER TO OPTIMIZE THE SYSTEM OF DEMOLITION OF A NUCLEAR POWER PLANT CHIMNEY	Maria Esposito, Novotech S.r.l. Aerospace Advanced Technology IT, Maurizio Arena, Università degli Studi di Napoli "Federico II" IT, Leandro Maio, Università degli Studi di Napoli "Federico II" IT, Antonio Dimatteo, GRIEC.A.M. IT, Stefano Castelli, GENERAL SMONTAGGI SPA IT, Leonardo Lecce, Università degli Studi di Napoli "Federico II" IT, , , , , , , , , , , ,
Field monitoring, full scale and wind tunnel measurements	112	Time domain modelling of self-excited aerodynamic forces for bridge decks. An experimental study	Ole Øiseth, Department of Structural Engineering, Norwegian University of Science and Technology NO, Bartosz Siedziako, Department of Structural Engineering, Norwegian University of Science and Technology NO, Yuwang Xu, Department of Structural Engineering, Norwegian University of Science and Technology NO, , , , , , , , , , , ,
Field monitoring, full scale and wind tunnel measurements	120	Laboratory and in situ testing of flat roof resistance against wind effects – Results of a comprehensive tests database and other research works	Edwige Noirfalisce, Belgian Building Research Institute (BBRI) BE, , , , , , , , , , , ,
Field monitoring, full scale and wind tunnel measurements	134	AERODYNAMIC BEHAVIOR OF TWO ARCHES: COMPARISON BETWEEN WIND TUNNEL TESTS AND FULL-SCALE MONITORING	Marco Belloli, Politecnico di Milano IT, Ilmas Bayati, Politecnico di Milano IT, Stefano Giappino, Politecnico di Milano IT, Sara Muggiasca, Politecnico di Milano IT, Lorenzo Rosa, Politecnico di Milano IT, , , , , , , , , , , ,
Field monitoring, full scale and wind tunnel measurements	139	Wind tunnel experiments of cross-ventilative cooling in a generic isolated building with heated wall	Katarina Kosutova, Eindhoven University of Technology NL, Christina Vanderwel, University of Southampton GB, Twan van Hooff, KU Leuven BE, Bert Blocken, Eindhoven University of Technology NL, Jan Hensen, Eindhoven University of Technology NL

Field monitoring, full scale and wind tunnel measurements	150	Measurements of low-frequency wind spectral properties relevant to design of long-span bridges	Etienne Cheynet, University of Stavanger NO, Jasna Bogunović Jakobsen, University of Stavanger NO, Jónas Snæbjörnsson, Reykjavík University IS, , , , , , , , , , ,
Field monitoring, full scale and wind tunnel measurements	179	Dynamic wind action on scaffoldings from full-scale measurements	Paulina Jamińska, Lublin University of Technology PL, Tomasz Lipecki, Lublin University of Technology PL, Jarosław Bęc, Lublin University of Technology PL, , , , , , , , , , ,
Field monitoring, full scale and wind tunnel measurements	180	In-situ measurements of wind action on scaffolding during working hours	Jarosław Bęc, Lublin University of Technology PL, Tomasz Lipecki, Lublin University of Technology PL, Paulina Jamińska, Lublin University of Technology PL, , , , , , , , , , ,
Field monitoring, full scale and wind tunnel measurements	186	ON THE USE OF IRWIN PROBES TO MEASURE WALL SHEAR STRESS IN RECTANGULAR DUCTS OF VARIABLE SECTION USING OPENFOAM	Raquel Faria, Polytechnic Institute of Coimbra, ISEC, Department of Mechanical Engineering PT, Almerindo D. Ferreira, ADAI-LAETA, Department of Mechanical Engineering, University of Coimbra PT, A.M.G. Lopes, ADAI-LAETA, Department of Mechanical Engineering, University of Coimbra PT, Antonio C. M. Sousa, Department of Mechanical Engineering, University of New Brunswick - Fredericton CA, , , , , , , , , , ,
Field monitoring, full scale and wind tunnel measurements	187	Evaluation of damping and natural period of tall RC buildings using full-scale data	Hongjin Kim, Kyungpook National University KR, Seung-Hoon Shin, Kyungpook National University KR, Kyung-Jae Shin, Kyungpook National University KR, Whajung Kim, Kyungpook National University KR, , , , , , , , , , ,
Field monitoring, full scale and wind tunnel measurements	194	In situ measurements of a tall structure to obtain horizontal foundation displacements	Sergio Sánchez Gómez, TNO NL, Chris Geurts, TNO NL, , , , , , , , , , ,
Field monitoring, full scale and wind tunnel measurements	199	Along and Cross - Wind Responses of the Stuttgart TV Tower During Different Campaigns for Certain Range of Wind Velocities	Peter Breuer, University of Applied Sciences DE, Tadeusz Chmielewski, Opole University of Technology PL, , , , , , , , , , ,
Field monitoring, full scale and wind tunnel measurements	222	Identification of a slight vortex induced vibration episode at the Grande Ravine Viaduct	Fernando Bastos, University of Porto - Faculty of Engineering PT, Elsa Caetano, University of Porto - Faculty of Engineering PT, Álvaro Cunha, University of Porto - Faculty of Engineering PT, Xavier Cespedes, SETEC FR, Olivier Flamand, CSTB FR, , , , , , , , , , ,
Field monitoring, full scale and wind tunnel measurements	238	Experimental and numerical studies on suppression of vortex-induced vibrations of twin box girders by central grids	Qiang Zhou, Research Center for Wind Engineering, Southwest Jiaotong University CN, Hongmiao Jing, Research Center for Wind Engineering, Southwest Jiaotong University CN, Bert Blocken, Department of the Built Environment, Eindhoven University of Technology NL, Haili Liao, Research Center for Wind Engineering, Southwest Jiaotong University CN, Mingshui Li, Research Center for Wind Engineering, Southwest Jiaotong University CN, , , , , , , , , , ,
Field monitoring, full scale and wind tunnel measurements	247	Lessons learned from Testing of a Transmission Line Model at the WindEEE Dome under Simulated Downbursts	Amal Elawady, The University of Western Ontario, Canada ; Ashraf El Damatty, The University of Western Ontario, Canada
Flow structure interactions	46	Wind pressure distributions on vibrating roof by numerical simulation method	Jian Zhang, Beijing's Key Laboratory of Structural Wind Engineering and Urban Wind Environment CN, Qingshan Yang, Beijing's Key Laboratory of Structural Wind Engineering and Urban Wind Environment CN, , , , , , , , , , ,

Flow structure interactions	70	Galloping of a square prism: comparison between different experimental approaches and modeling strategies	Lorenzo Banfi, University of Genova IT, Luigi Carassale, University of Genova IT, , , , , , , , , , , , , ,
Flow structure interactions	92	Tacoma Narrows Bridge flutter - Theory, experiment and full-scale observation	Allan Larsen, COWI DK, Maja Roenne, DTU DK, Marlene Malthe, DTU DK, Henrik Spietz, DTU DK, Jens Walther, DTU DK, , , , , , , , ,
Flow structure interactions	101	Aero-elastic behavior of high-rise buildings under downstream interference effects	Yuan-Lung Lo, Tamkang University TW, Yong Chul Kim, Tokyo Polytechnic University JP, Akihito Yoshida, Tokyo Polytechnic University JP, , , , , , , , , , , ,
Flow structure interactions	127	Forced oscillation simulations of a circular cylinder to analyze the fluid-structure interaction based on validated numerical results.	Ulf Winkelmann, Ruhr-Universität Bochum DE, Francesca Lupi, Ruhr-Universität Bochum (on leave from University of Florence) DE, Anina Šarkić Glumac, University of Belgrade RS, Rüdiger Höffer, Ruhr-Universität Bochum DE, , , , , , , , , , ,
Flow structure interactions	142	Pressure Distribution over a Typical Low-rise Building under Laboratory Simulated Tornado Vortices	Maryam Refan, WindEEE Research Institute CA, Ahmed Elatar, WindEEE Research Institute CA, Horia Hangan, WindEEE Research Institute CA, , , , , , , , , , , ,
Flow structure interactions	144	Aeroelastic forces in vortex-induced vibrations: critical analysis based on wind tunnel experiments	Francesca Lupi, Ruhr-Universitaet Bochum DE, Hans-Juergen Niemann, Ruhr-Universitaet Bochum DE, Ruediger Hoeffer, Ruhr-Universitaet Bochum DE, , , , , , , , , , , ,
Flow structure interactions	152	Coupled Simulation of Fluid-Structure-Control-Interaction for Vibration Mitigation of Lightweight Structures	Andreas Winterstein, Technical University of Munich DE, Roland Wüchner, Technical University of Munich DE, Kai-Uwe Bletzinger, Technical University of Munich DE, , , , , , , , , , ,
Flow structure interactions	155	Numerical investigation of aeroelastic forces at a cylinder with a rectangular cross-section of an aspect ratio of 4:1	Anina Šarkić Glumac, University of Belgrade RS, Ulf Winkelmann, Ruhr-University Bochum DE, Rüdiger Höffer, Ruhr-University Bochum DE, , , , , , , , , , , ,
Flow structure interactions	167	Turbulence effects on the post-critical response of flutter-based generators	Luca Pigolotti, CRIACIV/Department of Civil and Environmental Engineering, University of Florence IT, Claudio Mannini, CRIACIV/Department of Civil and Environmental Engineering, University of Florence IT, Gianni Bartoli, CRIACIV/Department of Civil and Environmental Engineering, University of Florence IT, , , , , , , , , , , ,
Flow structure interactions	170	Modeling of vortex-induced vibrations of an elongated rectangular cylinder through wake-oscillator models	Antonino Maria Marra, Department of Civil and Environmental Engineering, University of Florence IT, Claudio Mannini, Department of Civil and Environmental Engineering, University of Florence IT, Gianni Bartoli, Department of Civil and Environmental Engineering, University of Florence IT, , , , , , , , , , , ,
Flow structure interactions	178	GALLOPING INSTABILITY OF A STAY CABLE ATTACHED WITH A VISCOUS DAMPER	Cung Nguyen, Industrial University of Ho Chi Minh City VN, John Macdonald, University of Bristol GB, , , , , , , , , , , , ,

Flow structure interactions	193	Fluid-Structure Interaction Analysis of High-Rise Building with Inner Balcony and Corner Cut	Takamasa Hasama, Kajima Technical Research Institute JP, Yoshiaki Itoh, Kajima Technical Research Institute JP, Manabu Yamamoto, Kajima Technical Research Institute JP, Toshihide Saka, Kajima Technical Research Institute JP, Koji Kondo, Kajima Technical Research Institute JP, Tetsuro Tamura, Tokyo Institute of Technology JP, Mitsuo Yokokawa, Kobe University JP, , , , , ,
Flow structure interactions	203	Flutter suppression using a magnetic vibration absorber	Arnaud Malher, LadHyx,CNRS- Ecole Polytechnique FR, Xavier Amandolèse, LadHyx,CNRS- Ecole Polytechnique FR, Cyril Touzé, IMSIA FR, Olivier Doaré, IMSIA FR, Giuseppe Habib, University of Liège FR, Gaëtan Kerschen, University of Liège FR
Flow structure interactions	205	THE THIRD BOSPORUS BRIDGE – THE AERODYNAMIC STABILITY OF THE STEEL SEGMENTS DURING THE LIFTING	Vincent de Ville de Goyet, Bureau Greisch BE, Yves Duchene, Bureau Greisch BE, Thomas Andrienne, Université de Liege BE, , , , , , , , , , , ,
Flow structure interactions	214	Interference of vortex-induced vibration and galloping of a rectangular cylinder in turbulent flow	Claudio Mannini, University of Florence IT, Antonino Maria Marra, University of Florence IT, Tommaso Massai, University of Florence IT, Gianni Bartoli, University of Florence IT, , , , , , , , , , , ,
Flow structure interactions	231	Wind tunnel tests and performance improvement of a conveyor suspension bridge	Francesco Dorigatti, RWDI GB, Christopher Scollard, COWI CA, Guy Larose, RWDI CA, Pierre-Olivier Dallaire, RWDI CA, , , , , , , , , , , ,
Human comfort and built environment	7	The safety of pedestrians, cyclists and high sided vehicles in urban areas in windy conditions	Christopher Baker, University of Birmingham GB, Andrew Quinn, University of Birmingham GB, Hassan Heida, University of Birmingham GB, Mark Serling, University of Birmingham GB, Mike Jesson, University of Birmingham GB, Dominic Flynn, University of Birmingham GB, , , , , , , , , , , ,
Human comfort and built environment	18	The effect of changing the windward wall geometry of traditional wind tower (wind catcher) on aerodynamic behavior and natural ventilation in arid regions	Nasreddine Sakhri, Laboratory of Energetic in arid zones (ENERGARID) DZ, Abdeljebar Moussaoui, Laboratory of Energetic in arid zones (ENERGARID) DZ, Belkacem Draoui, Laboratory of Energetic in arid zones (ENERGARID) DZ, , , , , , , , , , , ,
Human comfort and built environment	35	Threats to people and infrastructure in Poland caused by tornadoes based on the past observations	Tadeusz Chmielewski, Warsaw University of Technology PL, , , , , , , , , , , ,
Human comfort and built environment	63	Wind-tunnel modeling of wind-driven rain for historical urban blocks	Sergey Kuznetsov, Institute of Theoretical and Applied Mechanics CZ, Stanislav Pospíšil, Institute of Theoretical and Applied Mechanics CZ, Arseniy Trush, Institute of Theoretical and Applied Mechanics CZ, Riccardo Cacciotti, Institute of Theoretical and Applied Mechanics CZ, , , , , , , , , , , ,
Human comfort and built environment	68	Numerical analysis on the cooling potential of an urban park	Yasin Toparlar, Eindhoven University of Technology NL, Bert Blocken, Eindhoven University of Technology NL, Bino Maiheu, Flemish Institute for Technological Research BE, Gert-Jan van Heijst, Eindhoven University of Technology NL, , , , , , , , , , , ,
Human comfort and built environment	84	Uncertainty quantification of an integral model and a CFD model to predict natural ventilation in Stanford's Y2E2 building	Giacomo Lamberti, Stanford University US, Catherine Gorlè, Stanford University US, , , , , , , , , , , ,

Human comfort and built environment	111	Numerical modeling of urban microclimate in a real compact area in the Mediterranean region: impact of urban morphology	Olga Palusci, Eindhoven University of Technology NL, Hamid Montazeri, KU Leuven BE, Bert Blocken, Eindhoven University of Technology NL, Paolo Monti, Sapienza Università di Roma IT, Carlo Cecere, Sapienza Università di Roma IT, , , , , , , , ,
Human comfort and built environment	132	The Use of CFD vs. Wind Tunnel Testing in Wind Microclimate Assessments	Krishan Jayyaratnam, RWDI GB, Ruth Shilston, RWDI GB, Daniel Hackett, RWDI GB, , , , , , , , ,
Human comfort and built environment	145	Design of the Citadel of Bonifacio urban area through experimental and numerical assessment of pedestrian comfort	Sylvain Aguinaga, CSTB FR, Stephane Sanquer, MeteoDyn FR, Dominique Dias, Urbaltherre FR, Marc Dufresne de Virel, CSTB FR, Julien Guilhot, CSTB FR, Cécile Nguyen, Urbaltherre FR, , , , , , , , ,
Human comfort and built environment	147	Numerical and wind-tunnel evaluation of ventilation conditions in a real compact heterogeneous urban area	Nestoras Antoniou, University of Cyprus, Technical University of Eindhoven NL, Hamid Montazeri, KU Leuven BE, Hans Wigo, University of Gavle SE, Marina Neophytou, University of Cyprus CY, Bert Blocken, Technical University of Eindhoven, KU Leuven NL, Mats Sandberg, University of Gavle SE, , , , , , , , ,
Human comfort and built environment	175	The effects of “lift-up” design of high-rise buildings on the pedestrian-level wind environment	Xuelin ZHANG, Department of Civil and Environmental Engineering, The Hong Kong University of Science and Technology HK, K.T. Tse, Department of Civil and Environmental Engineering, The Hong Kong University of Science and Technology HK, K.C.S. Kwok, Centre for Infrastructure Engineering Western Sydney University AU, C.M. Mak, Department of Building Services Engineering, The Hong Kong Polytechnic University HK, , , , , , , , ,
Human comfort and built environment	190	FIELD STUDY ON THERMAL COMFORT AT OUTDOOR ENVIRONMENT FOR TROPICAL HUMID COUNTRY	Nurnida Elmira Othman, Malaysia-Japan Institute International Technology (MJIIT), Universiti Teknologi Malaysia MY, Sheikh Ahmad Zaki Shaikh Salim, Malaysia-Japan Institute International Technology (MJIIT), Universiti Teknologi Malaysia MY, Azli Abd Razak, Faculty of Mechanical Engineering, Universiti Teknologi MARA MY, Nurul Huda Ahmad, UTM Razak School of Engineering and Advanced Technology, Universiti Teknologi Malaysia MY, , , , , , , , ,
Human comfort and built environment	252	The effects of green features on natural ventilation in buildings	Cheuk Ming Mak, The Hong Kong Polytechnic University, HK; Hai Ming Wong, The Hong Kong Polytechnic University; HK
Human comfort and built environment	257	Forces and pressure distributions on building facades with a screen: experimental twodimensional studies	Andrea Giachetti, University of Firenze, Italy ; Claudio Mannini, University of Firenze, Italy and Gianni Bartoli, University of Firenze, Italy
Industrial Aerodynamics	9	Aerodynamic and hydrodynamics aspects of the operation of trains through floodwater	Chris Baker, University of Birmingham GB, Hassan Hemida, University of Birmingham GB, Andrew Quinn, University of Birmingham GB, Mike Jenson, University of Birmingham GB, Dominic Flynn, University of Birmingham GB, , , , , , , , ,

Industrial Aerodynamics	36	Aerodynamic force on railway vehicles on an embankment in a turbulent boundary layer flow and a smooth flow	Yuhei Noguchi, Railway Technical Research Institute JP, Minoru Suzuki, Railway Technical Research Institute JP, Koji Nakade, Railway Technical Research Institute JP, , , , , , , , , , , , ,
Industrial Aerodynamics	188	Wind tunnel study of interference effects between twin chimney stacks on spatial distribution of wind loads	Jiadong Zeng, Research Center for Wind Engineering, Southwest Jiaotong University CN, Mingshui Li, Research Center for Wind Engineering, Southwest Jiaotong University CN, Zhiguo Li, Research Center for Wind Engineering, Southwest Jiaotong University CN, Ruwei Ma, Research Center for Wind Engineering, Southwest Jiaotong University CN
Industrial Aerodynamics	223	EFFECT OF BLOCKAGE ON WIND PRESSURE DISTRIBUTION ON MONOSLOPE CANOPY ROOFS	NEELAM RANI, INDIAN INSTITUTE OF TECHNOLOGY ROORKEE IN, ASHOK KUMAR AHUJA, INDIAN INSTITUTE OF TECHNOLOGY ROORKEE IN, , , , , , , , , , , , , ,
Industrial Aerodynamics	224	INFLUENCE OF POROSITY ON WIND PRESSURE DISTRIBUTION ON GABLE-ROOF BUILDINGS	SENJUMBENI KIKON, INDIAN INSTITUTE OF TECHNOLOGY ROORKEE IN, ASHOK KUMAR AHUJA, INDIAN INSTITUTE OF TECHNOLOGY ROORKEE IN, , , , , , , , , , , , , ,
Industrial Aerodynamics	241	EXPERIMENTAL INVESTIGATION OF INTERFERENCE EFFECTS ON AEROELASTIC MODEL OF NDCT	RAJEEV GUPTA, Indian Institute of Technology Kanpur, KANPUR 208016 (India) IN, SHARAD SAXENA, Indian Institute of Technology Kanpur, KANPUR 208016 (India) IN, VIVEK KANTI, Indian Institute of Technology Kanpur, KANPUR 208016 (India) IN
Lidar measuring techniques and its applications	118	Sensitivity test of different inflow conditions for CFD simulations of wind flow in urban areas	Alessio Ricci, Eindhoven University of Technology NL, Massimiliano Burlando, University of Genoa IT, Andrea Freda, University of Genoa IT, Maria Pia Repetto, University of Genoa IT, Ivo Kalkman, Eindhoven University of Technology NL, Bert Blocken, Eindhoven University of Technology NL, , , , , , , ,
Lidar measuring techniques and its applications	149	Wind turbulence measurements above the sea in an open fjord inlet using long-range synchronized lidars.	Etienne Cheynet, University of Stavanger NO, Jasna Bogunović Jakobsen, University of Stavanger NO, Jónas Snæbjörnsson, Reykjavík University IS, Guillaume Lea, Technical University of Denmark DK, Benny Svardal, Christian Michelsen Research AS NO, Jakob Mann, Technical University of Denmark DK, Michael Courtney, Technical University of Denmark DK, , , , , , , ,
Lidar measuring techniques and its applications	158	Measurement of the wind tunnel simulated boundary layer characteristics using short-range WindScanner Lidars	Alberto Zasso, Dipartimento di Meccanica, Politecnico di Milano, Milano IT, Stefano Giappino, Galleria del Vento POLIMI, Politecnico di Milano, Milano IT, Torben Mikkelsen, Dept. of Wind Energy, Technical University of Denmark, Roskilde DK, Mikael Sjöholm, Dept. of Wind Energy, Technical University of Denmark, Roskilde DK, Nikolas Angelou, Dept. of Wind Energy, Technical University of Denmark, Roskilde DK, , , , , , , , ,
Lidar measuring techniques and its applications	201	Vertical mean wind profiles identification using Wind Lidars: an application to the area of Lamezia Terme	Cristoforo Demartino, College of Civil Engineering, Nanjing Tech University, Nanjing 211816, PR China CN, Alberto Maria Avossa, DICDEA, Second University of Naples, Italy IT, Francesco Ricciardelli, DICDEA, Second University of Naples, Via Roma 9, 81031 Aversa (CE), Italy IT, Claudia Roberta Calidonna, Institute of Atmospheric Sciences and Climate, Lamezia Terme, Italy IT, , , , , , , , , , , ,

Linear and non-linear response of structures to wind	8	Probabilistic optimization of a suspension bridge deck using polynomial chaos expansion considering correlation among wind related random variables	Ibuki Kusano, Universidade da Coruña ES, Aitor Baldomir, Universidade da Coruña ES, José Ángel Jurado, Universidade da Coruña ES, Santiago Hernández, Universidade da Coruña ES, , , , , , , , , , ,
Linear and non-linear response of structures to wind	14	Simulation for Wind Response Behavior of a Super-high-rise Seismic Base Isolation Building under Passing Typhoons	Narumi Ougiya, Researcher, Haseko Corporation Technical Research Institute, Ms. Eng. JP, Makoto Kanda, Professor, Department of Architectural Engineering, College of Industrial Technology, Nihon University, Dr. Eng. JP, , , , , , , , , , ,
Linear and non-linear response of structures to wind	91	Wind Response Control of Building with Flexible Foundation Using Tuned Mass Dampers	Said Elias, IIT Delhi IN, , , , , , , , , , ,
Linear and non-linear response of structures to wind	94	Dynamic Response of an RC High-Rise Building under Wind Load, and Energy Dissipation Systems Effect	Aboubaker Gherbi, constantine university DZ, Mourad Belgasmia, setif university DZ, , , , , , , , , , ,
Linear and non-linear response of structures to wind	95	Nonlinear Behavior of High-Rise Steel Building under Wind Effect taking into account Soil-Structure Interaction	Souhaib Bougherra, Department of Civil Engineering, Constantine University DZ, Mourad Belgasmia, Department of Civil Engineering, Setif University DZ, , , , , , , , , , ,
Linear and non-linear response of structures to wind	114	Automatized Structural Optimization of lattice towers using realistic wind loads	Mirko Friehe, Center for Wind and Earthquake Engineering, RWTH Aachen University, Germany DE, Frank H. Kemper, Center for Wind and Earthquake Engineering, RWTH Aachen University, Germany DE, , , , , , , , , , ,
Linear and non-linear response of structures to wind	163	Wind induced response of long span bridges suspended from floating towers	Jungao Wang, University of Stavanger NO, Jónas Þór Snæbjörnsson, Reykjavik University IS, Jasna Bogunović Jakobsen, University of Stavanger NO, Etienne Cheynet, University of Stavanger NO, , , , , , , , , , ,
Linear and non-linear response of structures to wind	165	Experimental study on multi-mode rain-wind induced vibrations of a flexible cable	Dong-Lai Gao, Harbin Institute of Technology CN, Wen-Li Chen, Harbin Institute of Technology CN, Hui Li, Harbin Institute of Technology CN, , , , , , , , , , ,
Linear and non-linear response of structures to wind	172	Aeroelastic stability of a two-degrees of freedom system with additive and multiplicative narrow band random noises	Jiri Naprstek, Institute of Theoretical and Applied Mechanics CZ, Stanislav Pospisil, Institute of Theoretical and Applied Mechanics CZ, , , , , , , , , , ,
Linear and non-linear response of structures to wind	189	Experimental investigation of wind-induced responses considering interference of twin chimney stacks	Mingshui Li, Research Center for Wind Engineering, Southwest Jiaotong University CN, Zhiguo Li, Research Center for Wind Engineering, Southwest Jiaotong University CN, Ruwei Ma, Research Center for Wind Engineering, Southwest Jiaotong University CN, Bibo Zhong, Research Center for Wind Engineering, Southwest Jiaotong University CN
Linear and non-linear response of structures to wind	208	THE THIRD BOSPORUS BRIDGE – ITS BEHAVIOR UNDER WIND DURING THE DIFFERENT ERECTION STAGES AND THE FINAL CONFIGURATION	Vincent de Ville de Goyet, Bureau Greisch BE, Yves Duchene, Bureau Greisch BE, Arnaud Propson, Bureau Greisch BE, Marie Hérode, Bureau Greisch BE, , , , , , , , , , ,
Linear and non-linear response of structures to wind	209	THE LOUIS VUITTON FOUNDATION AND ITS DESIGN UNDER TURBULENT WIND	Vincent de Ville de Goyet, Bureau Greisch BE, Amaury Leroy, Bgroup Greisch BE, , , , , , , , , , ,

Linear and non-linear response of structures to wind	218	A corotational finite element formulation to model galloping vibrations of iced conductors	Francesco Foti, Politecnico di Milano IT, Luca Martinelli, Politecnico di Milano IT
Linear and non-linear response of structures to wind	221	Assessment of Aerodynamic Models via Categorical Approach	Igor Kavrov, Research Training Group 1462, Bauhaus-University Weimar DE, Dmitrii Legatiuk, Research Training Group 1462, Bauhaus-University Weimar DE, Klaus Gürlebeck, Chair of Applied Mathematics, Bauhaus-University Weimar DE, Guido Morgenthal, Chair of Modelling and Simulation of Structures, Bauhaus-University Weimar DE, , , , , , , , , , , ,
Linear and non-linear response of structures to wind	234	Tuned Mass Dampers for Vibration Control of High-Rise Buildings under Wind Loads with Soil-Structure Interaction	Ming-Yi Liu, Department of Civil Engineering, Chung Yuan Christian University TW, Sheng-Yin Huang, Department of Civil Engineering, Chung Yuan Christian University TW, , , , , , , , , , , ,
Linear and non-linear response of structures to wind	235	A Probabilistic Framework for Risk Assessment of Electric Power Transmission Lines Subjected to Hurricanes	Abdullahi Salman, Case Western Reserve University US, Yue Li, Case Western Reserve University US, , , , , , , , , , , ,
Linear and non-linear response of structures to wind	237	Wind-induced damage loss estimation in tall buildings accounting for directionality effects	Laura Ierimonti, University of Perugia IT, Luca Caracoglia, Northeastern University US, Ilaria Venanzi, University of Perugia IT, , , , , , , , , , , ,
Linear and non-linear response of structures to wind	240	rotational stability of a stochastic oscillator	Hélène Vanvinckenroye, University of Liège BE, Vincent Denoël, University of Liège BE
Linear and non-linear response of structures to wind	244	Preliminary Investigation to Assess the Application of Ductility-Based Design Approach for High Rise Buildings under Extreme Wind Loads	Fouad Elezaby, The University of Western Ontario, Canada ; Ashraf El Damatty, The University of Western Ontario, Canada
Linear and non-linear response of structures to wind	246	Analysis of Transmission Line Structures under Moving Downburst	Ahmed Shehata, The University of Western Ontario, Canada ; Ashraf El Damatty, The University of Western Ontario, Canada
Pollution dispersion	49	Wind Tunnel Experiments for Pollutant Plume Dispersion in the Atmospheric Boundary Layer over Hypothetical Urban Roughness	Ziwei Mo, Department of Mechanical Engineering, The University of Hong Kong HK, Chun-Ho Liu, Department of Mechanical Engineering, The University of Hong Kong HK, , , , , , , , , , , ,
Pollution dispersion	52	Effects of Hedges on Traffic Pollutant Dispersion in Urban Street Canyons	Christof Gromke, Institute for Hydromechanics, Karlsruhe Institute of Technology KIT DE, Nabaraj Jamarkattel, Institute for Hydromechanics, Karlsruhe Institute of Technology KIT DE, Bodo Ruck, Institute for Hydromechanics, Karlsruhe Institute of Technology KIT DE
Pollution dispersion	56	Dispersion within and above an array of blocks in a spatially developing boundary layer	Vincenzo Sessa, University of Southampton GB, Xie Zheng-Tong, University of Southampton GB, , , , , , , , , , , ,
Pollution dispersion	75	Wind tunnel studies of gas dispersion in urban areas	Petr Michálek, Aerospace Research and Test Establishment (VZLU), Prague CZ, David Zacho, Aerospace Research and Test Establishment (VZLU), Prague CZ

Statistics, Peak and Gust Factors, Extreme value prediction	67	A non-Gaussian probabilistic approach for estimating the equivalent static wind load on structures from unsteady pressure measurements in wind tunnel	Wafaa Kassir, Université Paris Est Marne La Vallée/ Centre scientifique et technique du bâtiment FR, Christian Soize, Université Paris Est Marne La Vallée FR, Jean Vivien Heck, Centre scientifique et technique du bâtiment FR, Fabrice De Oliveira, Centre scientifique et technique du bâtiment FR, , , , , , , , ,
Statistics, Peak and Gust Factors, Extreme value prediction	79	A method for estimating extreme wind pressure on independent blocks with short-term time history samples	Qingshan Yang, Beijing's Key Laboratory of Structural Wind Engineering and Urban Wind Environment, School of Civil Engineering, Beijing Jiaotong University, Beijing 100044, CN, Danyu Li, Beijing's Key Laboratory of Structural Wind Engineering and Urban Wind Environment, School of Civil Engineering, Beijing Jiaotong University, Beijing 100044, CN
Statistics, Peak and Gust Factors, Extreme value prediction	86	Statistical analysis of extreme wind speed due to thunderstorm outflows	Shi Zhang, School of Civil Engineering, Beijing Jiaotong University, China CN, Maria Pia Repetto, Department of Civil, Chemical and Environmental Engineering (DICC), Polytechnic School, University of Genoa, Italy IT, Giovanni Solari, Department of Civil, Chemical and Environmental Engineering (DICC), Polytechnic School, University of Genoa, , Italy IT, Qingshan Yang, School of Civil Engineering, Beijing Jiaotong University, China CN, , , , , , , ,
Statistics, Peak and Gust Factors, Extreme value prediction	126	Experimental investigation on the spatial distribution of wind pressure on building façades. Comparison between time-filtering and area-filtering of wind tunnel data.	Andrew Allsop, ARUP GB, Luca Amerio, Politecnico di Milano IT, Daniele Rocchi, Politecnico di Milano IT, Alberto Zasso, Politecnico di Milano IT, , , , , , , ,
Statistics, Peak and Gust Factors, Extreme value prediction	207	Prediction of long-term extreme wind-induced load effects for cable-supported bridges	Yuwang Xu, Norwegian University of Science and Technology NO, Ole Øiseth, Norwegian University of Science and Technology NO, Arvid Naess, Norwegian University of Science and Technology NO, Torgeir Moan, Norwegian University of Science and Technology NO, , , , , , , ,
Statistics, Peak and Gust Factors, Extreme value prediction	213	3-D Gust Effect Factor including VIV effects	Luisa Carlotta Pagnini, DICC - University of Genoa IT, Giuseppe Piccardo, DICC - University of Genoa IT, , , , , , , , , , , , , , , , , ,
Statistics, Peak and Gust Factors, Extreme value prediction	229	Problems and challenges when estimating extreme wind speeds	Arvid Naess, NTNU NO, , , , , , , , , , , , , , , , , ,
Statistics, Peak and Gust Factors, Extreme value prediction	251	Methods of increasing the accuracy of the simulation of wind effects based on preliminary statistical analysis of the frequency of occurrence of different wind forces in the directions	Olga Poddaeva, Moscow State University Of Civil Engineering (Mgsu) RU; Pavel Churin Moscow State University Of Civil Engineering (Mgsu) RU; Anastasia Fedosova, Moscow State University Of Civil Engineering (Mgsu) RU;
Stochastic and buffeting wind analysis	87	Proper Orthogonal Decomposition of Random Pressure Fields Acting on Tall Buildings	Luca Vacca, Robert Bird Group GB, Stefano Cammelli, BMT Fluid Mechanics GB, Yin Fai Li, University of Auckland NZ, , , , , , , , , , , , , , , , , ,

Stochastic and buffeting wind analysis	88	Investigation on damage and intervention costs induced by thunderstorm-like winds on tall buildings	Luca Caracoglia, Northeastern University US, ,
Stochastic and buffeting wind analysis	100	Investigation on peak factor of across-wind dynamic response of high-rise building	Shuguo Liang, School of Civil and Building Engineering, Wuhan University CN, Lei Wang, School of Civil Engineering, Henan Polytechnic University CN, Jie Song, School of Civil and Building Engineering, Wuhan University CN, ,
Stochastic and buffeting wind analysis	119	Experimental verification of a generic buffeting load model for high-rise and long-span structures	Robin George Srouji, Svend Ole Hansen ApS DK, Kristoffer Hoffmann, Svend Ole Hansen ApS DK, Morten Hansen, Svend Ole Hansen ApS DK, Svend Ole Hansen, SOH Wind Engineering LLC US, ,
Stochastic and buffeting wind analysis	153	Time domain Analysis of Solar Concentrator Structure under Gust Wind	Bassem Kaabia, Université de Sherbrooke CA, Sébastien Langlois, Université de Sherbrooke CA, Sébastien Maheux, Université de Sherbrooke CA, Frédéric Légeron, Parsons, Abu Dhabi AE, ,
Stochastic and buffeting wind analysis	198	Unsteady forces on flat-plate and panel due to a sudden variation of the wind direction	Xavier Amandolese, LadHyX-Ecole Polytechnique FR, Yuelong Yu, Shanghai Jiao Tong University CN, Yingzheng Liu, Shanghai Jiao Tong University CN, ,
Wind climate and the atmospheric boundary layer	28	Analysis of the duration of high winds during hurricanes	Gregory Kopp, University of Western Ontario CA, Sihang Li, University of Western Ontario CA, Hanping Hong, University of Western Ontario CA, ,
Wind climate and the atmospheric boundary layer	130	Revisiting the London Wind Climate	Daniel Hackett, RWDI GB, ,
Wind climate and the atmospheric boundary layer	176	Influence of background winds and storm motion on downburst outflow	Djordje Romanic, Wind Engineering. Energy and Environment (WindEEE) Research Institute, Western University CA, Dan Parvu, Wind Engineering. Energy and Environment (WindEEE) Research Institute, Western University CA, Horia Hangan, Wind Engineering. Energy and Environment (WindEEE) Research Institute, Western University CA, ,
Wind climate and the atmospheric boundary layer	191	FIELD MEASUREMENT OF TURBULENCE STATISTICS DURING AND BEFORE RAINFALL IN URBAN CANYON OF TROPICAL CLIMATE	HUSNA AINI, UTM MJIIT MY, SHEIKH AHMAD ZAKI, UTM MJIIT MY, Yusri Yusup, USM MY, ,
Wind climate and the atmospheric boundary layer	249	A parametric study of downbursts using a full-scale cooling source model	Eric Savory, University of Western Ontario CA; Christopher Oreskovic, University of Western Ontario CA; Leigh Orf, University of Wisconsin-Madison US
Wind effects on glass and cladding	38	Controlling of Sun Protecting Systems at Outside Glass Facades by Wind Characteristic Method	Hans Ruscheweyh, Ruscheweyh Consult GmbH DE, Reiner Windhövel, Ruscheweyh Consult GmbH DE, ,

Wind effects on glass and cladding	40	The effect of wind direction on pressure equalization on air permeable façade elements	Carine van Bentum, TNO NL, Chris Geurts, TNO NL, Okke Bronkhorst, TNO NL, , , , , , , , , , ,
Wind effects on glass and cladding	45	Wind loads on solar arrays mounted on flat roofs	Jingxue Wang, Beijing Jiaotong University CN, Qingshan Yang, Beijing Jiaotong University CN, Yukio Tamura, Beijing Jiaotong University JP, , , , , , , , , , ,
Wind effects on glass and cladding	48	Full scale investigation of wind loads on a light weight building-integrated photovoltaic system	Chris Geurts, TNO NL, Okke Bronkhorst, TNO NL, Carine van Bentum, TNO NL, , , , , , , , , , ,
Wind effects on glass and cladding	85	Wind Load Characteristics on a High-Rise Building with Rectangular Section	Xin Dong, Tongji Architectural Design (Group) Co. Ltd CN, Jiemin Ding, Tongji Architectural Design (Group) Co. Ltd CN, Changke Jiao, Engineering General Institute of Shanghai Construction Group CN, , , , , , , , , , ,
Wind effects on glass and cladding	115	Overall wind loads on large duo-pitch multi-span greenhouses	Okke Bronkhorst, TNO NL, Carine van Bentum, TNO NL, Chris Geurts, TNO NL, Leo van der Knaap, TNO NL, , , , , , , , , , ,
Wind effects on glass and cladding	135	Dynamic Wind Loads and Effects of Cladding Elements	Frank Kemper, CWE Center for Wind and Earthquake Engineering, RWTH Aachen University DE, , , , , , , , , , , , , , , ,
Wind effects on plants and vegetation	6	Reducing losses due to crop lodging	Christopher Baker, University of Birmingham GB, Mark Sterling, University of Birmingham GB, , , , , , , , , , , , , , , ,
Wind effects on plants and vegetation	106	Wind-induced foliage dynamics	Loïc Tadriss, University of Liège BE, Marc Saudreau, INRA Clermont-Ferrand FR, Pascal Hémon, Ecole Polytechnique FR, Xavier Amandolèse, Ecole Polytechnique FR, André Marquier, INRA Clermont-Ferrand FR, Tristan Leclercq, Ecole Polytechnique FR, Emmanuel de Langre, Ecole Polytechnique FR, , , , , , ,
Wind effects on plants and vegetation	140	Forest Flow Characteristics during Extreme Gust Passages	Christof Gromke, Institute for Hydromechanics, Karlsruhe Institute of Technology KIT DE, Bodo Ruck, Institute for Hydromechanics, Karlsruhe Institute of Technology KIT DE, , , , , , , , , , , , , , , ,
Wind energy	17	A comparative wind tunnel study of energy harvesting from galloping and wake galloping of square prisms	Pascal Hémon, LadHyX, CNRS-Ecole Polytechnique FR, , , , , , , , , , , , , , , ,
Wind energy	22	Determination of aerodynamic Damping and vortex-shedding Correlation Length of Wind Turbine Towers based on Wind Tunnel Experiments with High Frequency Force Balance (HFFB) and Forced-Oscillations Methods	Robert Fontecha, RWTH Aachen DE, Frank Kemper, RWTH Aachen DE, Markus Feldmann, RWTH Aachen DE, , , , , , , , , , , , , , , ,

Wind energy	27	Towards accurate performance prediction of a vertical axis wind turbine operating at different tip speed ratios	Abdolrahim Rezaeiha, Eindhoven University of Technology NL, Ivo Kalkman, Eindhoven University of Technology NL, Bert Blocken, Eindhoven University of Technology/KU Leuven NL, , , , , , , , , , , ,
Wind energy	31	Numerical investigation on the anisotropy of wind turbine wake	Jianxiao Hu, Beijing's Key Laboratory of Structural Wind Engineering and Urban Wind Environment , School of Civil Engineering, Beijing Jiaotong University, Beijing, China CN, Qingshan Yang, Beijing's Key Laboratory of Structural Wind Engineering and Urban Wind Environment , School of Civil Engineering, Beijing Jiaotong University, Beijing, China CN
Wind energy	59	On the influence of the shape of buildings in urban wind energy harvesting	Giulio Vita, University of Birmingham GB, Hassan Hemida, University of Birmingham GB, Charalampos Baniotopoulos, University of Birmingham GB, , , , , , , , , , , ,
Wind energy	61	A study of wind energy potential in building through-passages combined with automated shape optimization	Ivo Kalkman, Eindhoven University of Technology NL, Bert Blocken, Eindhoven University of Technology NL, , , , , , , , , , , ,
Wind energy	73	AERODYNAMIC DESIGN OF A WIND TURBINE DIFFUSER WITH OPENFOAM	FÉLIX SORRIBES-PALMER, Instituto de Microgravedad 'Ignacio Da Riva' Universidad Politécnica de Madrid (IDR/UPM) ES, ÁNGEL SANZ-ANDRES, Instituto de Microgravedad 'Ignacio Da Riva' Universidad Politécnica de Madrid (IDR/UPM) ES, SEBASTIÁN FRANCHINI, Instituto de Microgravedad 'Ignacio Da Riva' Universidad Politécnica de Madrid (IDR/UPM) ES, MIKEL OGUETA, Instituto de Microgravedad 'Ignacio Da Riva' Universidad Politécnica de Madrid (IDR/UPM) ES
Wind energy	81	Integrated double skin façade system for wind energy harvesting	Sina Hassanli, Centre for Infrastructure Engineering, Western Sydney University AU, Gang Hu, CLP Power Wind/Wave Tunnel Facility, Hong Kong University of Science and Technology CN, K. C. S. Kwok, Centre for Infrastructure Engineering, Western Sydney University AU, , , , , , , , , , , ,
Wind energy	107	Effects of wind-wave misalignment on the dynamic response of an offshore wind turbine in sloping bottom-induced fully nonlinear waves	Agota Mockute, University of Florence IT, Enzo Marino, University of Florence IT, Claudio Borri, University of Florence IT, , , , , , , , , , , ,
Wind energy	128	2D URANS simulation of aerodynamic loads on a pitching airfoil: Impact of computational parameters	Feiyu Geng, Eindhoven University of Technology NL, Ivo Kalkman, Eindhoven University of Technology NL, Akke Suiker, Eindhoven University of Technology NL, Bert Blocken, Eindhoven University of Technology and KU Leuven NL, , , , , , , , , , , ,
Wind energy	136	Safe Wind Rose Distributions for a more realistic Assessment of the Fatigue Behavior of Towers and Wind Turbines	Frank Kemper, CWE Center for Wind and Earthquake Engineering, RWTH Aachen University DE, , , , , , , , , , , ,

Wind loading codes and standards	168	Reliability framework for the quantification of wind load uncertainties	Jacques Botha, Stellenbosch University ZA, Johan Retief, Stellenbosch University ZA, Celeste Viljoen, Stellenbosch University ZA, , , , , , , , , , ,
Wind loading codes and standards	183	The New Hong Kong Wind Code	Andrew Allsop, Ove Arup and Partners GB, , , , , , , , , , , , , , , ,
Wind loading codes and standards	220	METHOD OF DETERMINING CHARACTERISTIC VALUES OF AVERAGE AND MAXIMUM WIND PRESSURE FROM THE CARPATHIANS ZONING TRANSCARPATHIAN REGION	Roman Kinasz, AGH University of Science and Technology & National University "Lviv Polytechnic" PL, Yaroslav Huk, Uzhgorod National University UA, , , , , , , , , , , , , , , ,
Wind loading codes and standards	226	Closed-form prediction of the wind-induced fatigue of structures	Maria Pia REPETTO, University of Genova IT, Michela Damele, University of Genova IT
Wind loading codes and standards	239	Extensive wind tunnel measurements to explore the conditional expected load method	Nicolas Blaise, University of Liège BE, Thomas Andrianne, , Vincent Denoël, , , , , , , , , , , , , , , ,
Wind loading codes and standards	250	Adjustment of regulatory documents of the Russian Federation in the field of wind loads on building structures on the basis of learning and adaptation of the Eurocodes requirements	Olga Poddaeva, Moscow State University Of Civil Engineering (Mgsu) RU; Pavel Churin Moscow State University Of Civil Engineering (Mgsu) RU; Anastasia Fedosova, Moscow State University Of Civil Engineering (Mgsu) RU;
Wind-blown sand and snow drifts	171	A new measurement approach to analyse aeolian particle deposition with a 3D photogrammetry technique in the boundary layer wind tunnel	Cornelia Kalender, Ruhr-Universität Bochum, Wind Engineering and Flow Mechanics DE, Volkmar Görndt, Ruhr-Universität Bochum, Wind Engineering and Flow Mechanics DE, Yi Wang, Ruhr-Universität Bochum, Wind Engineering and Flow Mechanics DE, Simon Kosse, Ruhr-Universität Bochum, Wind Engineering and Flow Mechanics DE, Rüdiger Höffe, Ruhr-Universität Bochum, Wind Engineering and Flow Mechanics DE, , , , , , , , , , , , , , , ,
Wind-blown sand and snow drifts	177	Comparison between wind tunnel and computational predictions of the shear velocity distribution along a flat roof with solar panels	Almerindo Ferreira, University of Coimbra PT, Thomas Thiis, Norwegian University of Life Sciences NO, , , , , , , , , , , , , , , ,
Windborne debris	2	The physical simulation of tornado-like vortices	Frederick Bourriez, University of Birmingham GB, John Bridgeman, University of Birmingham GB, Chris Baker, University of Birmingham GB, Mark Sterling, University of Birmingham GB, , , , , , , , , , , , , , , ,
Windborne debris	116	A Solid-Fluid Coupling Simulation for Wind Borne Debris: Auto-Rotating Flat Plate and Flying Flat Plate	Kazuaki Uchibori, Tokyo Institute of Technology JP, Tetsuro Tamura, Tokyo Institute of Technology JP, , , , , , , , , , , , , , , , ,
Wind-Snow engineering	64	Numerical modeling of ice accretion shape due to freezing precipitation on engineering structures	Krzysztof Szilder, Aerospace, National Research Council Canada CA, ,
Wind-Snow engineering	217	Experimental investigation of snow accumulation	Jennifer Fiebig, Technical University of Denmark DK, Holger Hundborg Koss, Technical University of Denmark DK, ,
